About CTM Lyng AS

In 2015, CTM became part of Addtech Nordic AB, which is a business unit in the Addtech Group (Addtech AB). The Addtech Group is made up of approximately 140 companies with around 2,200 employees and turnover in the region of SEK 6.5 billion.

CTM Lyng AS is Norway's leading manufacturer and supplier of security products for the home, assistive technology, energy efficiency, and light and heating control for all building types under the Mkomfy®, VERN, Microsafe® and Centrol® brands. We distribute our products through electrical wholesalers. We offer everything from product development to production and distribution. Our production facility in Vanvikan is equipped with some of the most advanced machinery in Europe.

Our headquarters is in

● Vanvikan, where administration, production, logistics and distribution are taken care of, while the development and marketing departments are based in ● Klæbu.

Distribution

CTM Lyng only sells through wholesalers. All our products are stocked by or can be ordered through any electrical wholesaler in Norway.

Guarantee & Service

All our 'on/off' products come with a 7-year guarantee.

The 7-year guarantee applies to thermostats, cooker guards, relays and motion sensors (without a dimmer) based on the date of production. Dimmers, which come with a 5-year guarantee, are currently the only exception.

Sparkless relay technology

Our patented sparkless relay technology is used in all our 'on/off' products. Sparkless switching eliminates what essentially wears relays out, the spark. Sparks gradually contaminate the actual relay contacts, causing them to fuse together. Our relays have a virtually unlimited life and we guarantee 11 million switch operations, although the supplier gives the relay itself a much shorter life.

CTM Lyng AS – focusing on security

CTM Lyng became part of Addtech AB on 18 August 2015.

We are still the same reliable supplier of security and comfort products, lighting and heating control, and assistive technology. Our products are developed and manufactured in (Central) Norway.

A total supplier – from product idea to distribution.

- Product idea
- Development
- Purchasing
- Production/PCB assembly
- Coating (lacquer and encapsulation)
- Assembly

Branding menu

MTemp

MICROSAFE®

Microsafe® MTemp, Thermostat

The MTemp shows the precise temperature on the digital display.

The temperature is simple to adjust using the + and - buttons.

The display shows the actual temperature in the room in which the thermostat or external sensor is located. If + / - is pressed, the display switches to showing the set temperature and then returns to the actual temperature. Red LED indicates that heating is in progress.

Can be used with any floor sensor (see parameter menu)
The MTemp is available in a 1/2-pole 3600/2300 VA version.

The perfect project thermostat

PART NO.	NAME	
5450340	MTemp	16A/2300VA 2P
5450341	MTemp	16A/3600VA 1P

TECHNICAL DATA			
Physical dimensions:	Conforms to RS16	Temp./Power:	5-40°C
Voltage:	230 VAC +10/-20%	Floor sensor:	Own terminal (Fig. 1)
Max. load:	2,300/3,600 VA	Fuse:	16 A

Floor sensor (MGF47k, Part No. 5450304) included.

FEATURES

- ✓ Very simple to use.
- ✓ Unique design.
- ✓ Display showing the actual temperature in the room in which the thermostat or external sensor is located.
- ✓ Adjustment up/down of temperature controlled by button.
- ✓ Sparkless relay offers superior reliability, low heat generation and virtually silent switching.

Function table

	MTRNS / W/ TermREG	MTRNS/W/ Blue/Blind	MTR/W Term/reg. 1- and 2-pole	M-Temp 1- and 2-pole	M-Reg 1- and 2-pole	MTR-W Hotell
ON/OFF: Quick press of On/Off button ⑥	●	●	●	●	●	●
Temp. adjustment: To increase temperature, press plus button ②. To lower temperature, press minus button ③. Set temperature will appear on display for 5 seconds.	●	●	●	●		●
Thermostat/Regulator mode: Switch between thermostat and regulator mode by pressing plus button ② and minus button ③ simultaneously for 3 seconds.	●	●	●			
Frost protection (thermostat mode only): In thermostat mode with thermostat off, FP is visible on display. This means that frost protection is activated. Thermostat will come on at approx. 5 °C or below to prevent frost damage. NB: In regulator mode, frost protection will not be active if thermostat is off.	●	●	●	NO FROST PROTECTION		
Child safety: Hold ON/OFF button ⑥ in for approx. 8 seconds to activate Child safety. Confirmed by display flashing briefly. Repeat to turn child safety off.	●	●	●	NO CHILD SAFETY		
Nighttime temperature drop (NTD): Hold in button ⑩ for 3 seconds until green LED flashes. NTD is activated when green LED is on. A quick press on button ⑩ deactivates NTD for 24 hours, but it is reactivated automatically the next day. For permanent deactivation, go to Parameter P3.	●	●	NO NIGHTTIME TEMPERATURE DROP			
Limiter/Parquet function: (Menu P6 & P8) Function used with parquet floors to prevent overheating. Set in parameter menu P6 (Max temperature).	●	●	●			
Calibration: (Menu P0) Hold a reliable thermometer next to thermostat and set correct temperature on thermostat with + ② and - ③ buttons. Set temperature will be stored automatically after 10 seconds.	●	●	●			
Display ① shows actual temperature.	●	●	●	●		●
Quick press on Plus ② or Minus ③ button displays selected temperature.	●	●	●	●		●
Dot on ④ display indicates that a floor or wall sensor is connected.	●	●	●	●		●
Dot ⑤ indicates regulator mode.	●	●	●		●	
Red LED ⑦ indicates that heater/element is enabled.	●	●	●	●	●	●
Amber LED ⑧ indicates day mode.	●	●	NO NIGHTTIME TEMPERATURE DROP			
Green LED ⑨ indicates nighttime temperature drop mode. Lowers temperature by (e.g. 5°C in relation to set value), and 50% in regulator mode.	●	●				

Limiter/Parquet function

Most of our thermostats have as standard a limiter function, which means that the floor cannot get hotter than 28°C. The function is factory-set to on, but can be turned off or adjusted.

The automatic limiter function is designed to stop parquet floors being damaged by too high a temperature.

Depending on the floor type, it may be advisable to change the maximum temperature. Always check with the floor manufacturer how much heat the floor can cope with before increasing the temperature.

Thermostat selector

We have thermostats and power regulators for every purpose. With all the different products, it is easy to lose your way.

But our product selector makes it simple to find the right product based on the functions needed.

It is also possible to find an equivalent by searching for other manufacturers' part numbers.

For the design conscious

Mkomfy 2G Sensor

Offer the customer a cooker guard sensor to match their kitchen!

Still the best cooker socket on the market?

...thanks to your feedback!

External wireless reset button supported

Strain relief for wall installation in corner

Mkomfy 25, Wireless or wired

NEK 400:2014

NEK EN 50615

Also available in black or silver

microsafe®

FEATURES

- ✓ Fixed cooker guard.
- ✓ Double security: Time & Temperature.
- ✓ Turns cooker off automatically after 2 hours if off delay button is not used (expandable).
- ✓ Turns cooker off automatically if hob overheats.
- ✓ Fast, simple installation and use.
- ✓ Different bracket solutions for the sensor are available for installation in the hood or for 50-70 cm over the hob.
- ✓ Sparkless 25 A relay in cooker socket.
- ✓ Tamper protection.

Microsafe® Mkomfy 25, Fixed Cooker Guard

The fixed cooker guard is a security product that monitors your hob/cooker. It performs a dual security function: timer and monitoring for overheating. The Mkomfy has tamper protection.

The Mkomfy consists of two modules: a cooker guard sensor (which goes on the wall over the cooker) and a cooker socket for connecting the hob.

TIPS Also available in a 16 A version, see separate product sheet.

The **cooker guard** goes on the wall or in the hood over the cooker with wireless communication to the cooker socket.

The **cooker socket** replaces a traditional socket. The hob connects directly to it.

Mkomfy 2G, Designer, Wireless

Now with new, improved function button!

The button is held in place and cannot get lost during installation.

Microsafe® Mkomfy 2G 25R, Fixed Cooker Guard

The cooker guard is a security product that monitors the hob on your cooker. It performs a dual security function: timer and monitoring for overheating.

The Mkomfy has tamper protection.

The 2G has a built-in location sensor for ease of installation. Built-in bracket for installation on wall or in cooker hood/extractor, 50-120 cm over hob.

The Memory placement function avoids having to reinstall the cooker guard after changing the battery, for example.

The Mkomfy consists of two modules: a cooker guard sensor (which goes on the wall over the cooker) and a cooker socket for connecting the hob.

- ✓ Built-in location sensor.
- ✓ Turns cooker off automatically after 2 hours if off delay button is not used (expandable).
- ✓ Turns cooker off automatically if hob overheats.
- ✓ Fast, simple installation and use.
- ✓ Battery life 6 years.
- ✓ Memory placement function.
- ✓ Tamper protection.
- ✓ Sparkless 25 A relay in cooker socket.

The **cooker guard** goes on the wall or in the hood over the cooker with wireless communication to the cooker socket.

The **cooker socket** replaces a traditional socket. The hob connects directly to it.

Mkomfy R-T, Panel-installed

Also available with 2G sensor

MICROSAFE®

FEATURES

- ✓ Cooker guard relay for panel installation.
- ✓ Can also control a contactor.
- ✓ Double security: Time & Temperature.
- ✓ Turns cooker off automatically after 2 hours if off delay button is not used (expandable).
- ✓ Turns cooker off automatically if hob overheats.
- ✓ Tamper protection.

Mkomfy R-T 25A, with panel-installed cooker guard relay

The Mkomfy is a security product that monitors your hob/cooker. It performs a dual security function: timer and monitoring for overheating. The Mkomfy has tamper protection.

The Mkomfy R-T is designed for panel installation and consists of two modules: a cooker guard sensor (which goes on the wall over the cooker) and a relay installed on the panel/distribution board.

They talk to each other wirelessly and are uniquely paired at the factory.

It can also control a contactor (RC circuit wired in parallel with coil on contactor recommended).

The cooker guard sensor goes on the wall or in the hood over the cooker with wireless communication to the cooker guard relay.

Why choose a CTM Lyng cooker guard?

There is a complete range of Mkomfy cooker guards to choose from!
Do you want wireless, wired or designer?
Are reliability, guarantees and outstanding service a priority?
Do you attach great importance to ease of installation and use?
Do you expect the supplier behind the products to be experienced and reliable in every department?

Then you can safely choose Mkomfy!

The technology behind the product

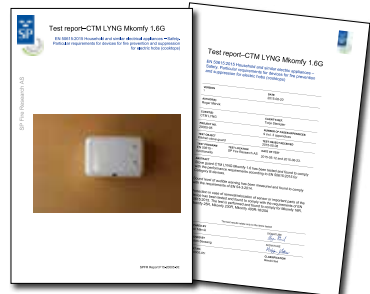

- Unique relay technology in the socket, for a long life
- The first to bring out new functions, for easier installation, use and reliability
- Suitable for system integration, together with other functions (Water Shut-off, Power Cut-off, etc.)

Target group

- All new homes
- Home renovations
- Elderly, invalids and disabled
- Assistive technology
- Student accommodation
- Housing cooperatives
- Nurseries and schools

Approvals

It goes without saying that Mkomfy cooker guards comply with ALL NEK2014 and EN50615 requirements.

Finally someone who has recognised the opportunities and potential in **Assistive Technology** for the electrical industry...

Power Cut-off

VERN Power Cut-off automatically disconnects the power supply to sockets it is paired with when a fire alarm goes off.

Water Shut-off

VERN Water Shut-off ensures that the whole dwelling, individual rooms and relevant appliances are only supplied with water when needed.

Cooker Guards

The VERN Cooker Guard sensor is a security product that monitors your hob. It performs a dual security function: Timer and monitoring for overheating.

Timer

The VERN Timer controls the power supply to sockets it is paired with, and, where appropriate, the water supply to the dwelling, individual rooms and relevant consumer electronics/appliances.

Master Switch On/Off

The water and all power sockets can be turned on or off with a quick press of the VERN Master Switch. Protect the home against damage by turning off the water and appliances while you are asleep or out.

The system controls power sockets (16 A or 25 A) wirelessly.

Appliance Shut-off $\frac{3}{4}$ " Moisture Sensor

Part No. 564 85 01

1 x Valve $\frac{1}{2}$ " with $\frac{3}{4}$ " connection
with rotating nut
1 x Moisture Sensor

Simple appliance shut-off
with moisture sensing.

Basic Package Apartment/Chalet $\frac{1}{2}$ "

Part No. 564 85 04

1 x Valve $\frac{1}{2}$ "
1 x Motion Sensor
2 x Moisture Sensor

Complete water shut-off, designed
for apartments or chalets.

Appliance Shut-off $\frac{3}{4}$ " On/Off

Part No. 564 85 05

1 x Valve $\frac{1}{2}$ " with $\frac{3}{4}$ " connection
with rotating nut
1 x On/Off Panel

Simple appliance shut-off,
with on/off switch,
which can be installed anywhere.

Basic Package Apartment without water heater $\frac{1}{2}$ "

Part No. 564 85 02

2 x Valve $\frac{1}{2}$ "
1 x Motion Sensor
2 x Moisture Sensor

Complete water shut-off designed
for apartments and the like
that do not have their own water heater.

Appliance Shut-off $\frac{3}{4}$ " Motion

Part No. 564 85 06

1 x Valve $\frac{1}{2}$ " with $\frac{3}{4}$ " connection
with rotating nut
1 x Motion Sensor

Demand-controlled appliance shut-off.
Operating time can be adjusted on the valve.

Basic Package House $\frac{3}{4}$ "

Part No. 564 85 03

1 x Valve $\frac{3}{4}$ "
2 x Motion Sensor
3 x Moisture Sensor

Complete water shut-off,
designed for single-family house.

Aqua Xpress is a flexible water
shut-off system that can be
expanded to accommodate
different needs and security levels.

Microsafe Recessed Relay, Radio

1-Pole 16 A 230 V

Part No. 4150114

- ✓ Wireless communication 868.100 MHz
- ✓ Complete with 10 cm cables with ferrules and Wago clamp
- ✓ Dimensions: 45.5 x 36.5 x 20.5 mm

Motion sensor with dimmer

MBD AutoLight DimLed

The optimum solution for homes, smaller rooms, conference rooms, offices, etc., for energy savings and convenience.

See page 33

microsafe®

Microsafe® MDimLed MultiDim Dimmer

The MDimLed can dim most dimmable types of light/lamp, from the lowest to the highest level. Light level indicated on display, from 1-99. The light level is controlled by means of the \oplus and \ominus buttons. The MDimLed has a 2-pole break when switched off/on and remembers previously set level when switched on. 'AutoHertz' means that the dimmer itself detects whether it is connected to 230 V at 50 or 60 Hz. Dims most load types. See load table below.

Light source	Power
Incandescent bulbs and 230 V halogen	5-315 W
12 V halogen with electronic transformer, trailing-edge dimming	20-315 W
12 V halogen with iron-core transformer, leading-edge dimming	20-315 VA
Dimmable LED light sources, trailing-edge dimming (Suitable for most LED drivers)	1-250 W
Dimmable LED light sources, leading-edge dimming	1-250 W
Dimmable energy-saving bulbs, trailing-edge dimming	5-250 W
Dimmable energy-saving bulbs, leading-edge dimming	5-250 W

PART NO.	NAME
1418267	MDimLed MultiDim

TECHNICAL DATA			
Physical dimensions:	Conforms to RS16 24 mm mounting depth	Outputs:	2-pole break, 315 VA.
Voltage:	230 VAC +10/-20%	Light level:	1-99
Max. load:	See load table	Min. load:	See load table
Protection:	Electronic thermal protection (OL on display). Mechanical thermal protection. Electronic short-circuit protection.		

FEATURES

- ✓ All dimmable loads.
- ✓ Simple programming of max./min. level and lowest switch-on level.
- ✓ 2-pole break and 'remembers' previously set level when switched on.
- ✓ Display shows brightness 1-99.
- ✓ AutoHertz 50/60 Hz - perfect for offshore etc.
- ✓ Buttons for adjusting brightness up/down and on/off.
- ✓ Electronic monitoring of operating temperature (safety).
- ✓ Conforms to RS-16 standard.
- ✓ Mounting depth just 24 mm.
- ✓ Autoscoping of regulating level.

MICROSAFE®

Microsafe® MBD AL DimLed/Lux Motion Detector

The MBD AutoLight DimLed (1418222) and DimLedLux (1418223) are in reality complete control systems for lighting, in various rooms.

The DimLed offers simple light control with automatic switch-on at the previously set light level. The combination of a motion detector with a flexible turn-off time and an LED dimmer is the optimum solution for small rooms, conference rooms, offices, etc., and offers excellent energy efficiency.

Adding the Lux sensor function of the DimLedLux provides the perfect solution for lounges, kitchens, conference rooms, classrooms, etc., which often have a lot of natural light, so ceiling lighting is not needed for parts of the day.

Try the MBD AL DimLed and DimLedLux! We know you won't be disappointed!

FEATURES

- ✓ OFF/AUTO/DIM button
- ✓ Turn-off time 1 min. to 2 hours
- ✓ Ceiling: 360° detection
- ✓ Wall: 100°x90° angle of coverage
- ✓ Up to 12-metre range (ceiling Ø6.5 m)
- ✓ Construction and colour conform to RS-16 standard
- ✓ Mounting depth just 24 mm
- ✓ Also available in lux version with light meter
- ✓ Built-in thermal protection at 75°C (internal temp.)

MICROSAFE®

Microsafe® MBD 10/16, Motion Detector

The motion detector (MBD) is designed for automatic light control in rooms that are used sporadically, e.g. classrooms, smoking rooms, gyms, sports halls, stockrooms, laundry rooms, corridors, bathrooms, stores, etc., for greater convenience and to save electricity.

The MBD has a built-in timer that can be adjusted from 2 seconds to 2 hours. The MBD can be used to advantage in combination with lights, extraction, heating, etc., and saves a lot of electricity in such contexts.

The desired turn-off time (delay) can be set on the back of the MBD by turning a rotary switch between 0 and F. The LED on the front indicates movement (activity).

Microsafe® MBD AutoLight S/SW (Lux) Motion Detector

The motion sensor (MBD AL) is designed for automatic light control in rooms that are used sporadically, e.g. classrooms, meeting rooms, gyms, sports halls, stockrooms, laundry rooms, corridors, bathrooms, stores, etc., for greater convenience and to save electricity.

The MBD AL can be used to advantage in combination with lights, extraction, heating, etc., and saves a lot of electricity in such contexts. MDB offers a saving of up to 70% compared with a standard switch.

The MBD AL has an ON/OFF/AUTO button. In AUTO, the light only comes on if there is movement and stays on for 2 min., for example, after the last detected movement (adjustable from 2 sec. - 2 hours, see table on right).

The Lux version also has a light sensor, so the light will not come on if there is light already (adjustable from 50-500 lux).

FEATURES

- ✓ ON/OFF/AUTO button
- ✓ Simple to program with turn-off time from 2 sec to 2 hours
- ✓ Ceiling: 360° detection.
- ✓ Wall: 100°x90° angle of coverage
- ✓ Approx. 12-metre range (ceiling Ø6.5 m)

Automatic lighting control for long areas

MICROSAFE®

Microsafe® Corridor Relay For long areas

The corridor relay package comes complete with one or more sensors on brackets, ready connected to a relay with a choice of cable lengths.

The combination is ready to use, with our familiar relay technology in Microsafe® products and quality sensors.

PART NO.	NAME	
1403890	Corridor relay 40 m	1 middle bracket with 2 x 20 m sensor
1403891	Corridor relay 20 m	1 end bracket with 20 m sensor
1403892	Corridor relay 2x20 m	2 end brackets with 20 m sensors
1418295	Corridor relay 20 m IP65	1 sensor with 20x6 m coverage

TECHNICAL DATA			
Voltage:	230 VAC +10/-20%	Max. load:	16 A
Internal power supply	12 VDC	Turn-off time:	1 sec - 5 hours

FEATURES

- ✓ Complete with pre-connected sensor on mounting bracket and internal wiring to corridor relay.
- ✓ Up to 6 sensors can be used with the same relay.
- ✓ Full flexibility with fast, simple installation.
- ✓ 1 sec. - 5 hours turn-off time.

Did you know that renovating some corridors in a hotel or school, for example, will pay for itself in a few months?

TIPS! Up to 6 different sensors can be connected to the same relay to cover all area types.

See www.ctmlyng.no for the full range of sensors.

Automatic lighting control for large areas

MICROSAFE®

FEATURES

- ✓ Complete with pre-connected sensor and internal wiring to corridor relay.
- ✓ Several sensors can be used with the same relay.
- ✓ Full flexibility with fast, simple installation.
- ✓ 1 sec. - 5 hours turn-off time.

Did you know that renovating some corridors in a hotel or school, for example, will pay for itself in a few months?

TIPS! Up to 6 different sensors can be connected to the same relay to cover all area types.

See www.ctmlyng.no for the full range of sensors.

Microsafe® Corridor Relay 360° For large areas

The corridor relay package comes complete with one or more sensors, ready connected to a relay with a choice of cable lengths.

The combination is ready to use, with our familiar relay technology in Microsafe® products and quality sensors.

The 360° Proff has 3 PIR sensors, which provide very good coverage in large areas. Suitable for use in sports halls and production workshops, for example, with a ceiling height of up to 8.5 m.

- ✓ Simple to install and use
- ✓ Energy-saving function (4 hours at night)
- ✓ Simple programming of light level (press cover for 3 sec.)
- ✓ Switch for turning off at night
- ✓ Test function (press cover for 1 sec.)
- ✓ Recess at bottom (back) for concealed wall mounting.
- ✓ 16 A, all lamp types
- ✓ RC conductor integrated on PCB

MDIM 420

**Leading-edge dimming (GL) 420 VA,
2-pole break
Part No. 1418262**

- ✓ Conforms to RS 16 standard
- ✓ Leading-edge dimming for hybrid transformers, incandescent bulbs, fluorescent lights, iron-core transformers, etc.

MDIM 1-10 V

Part No. 1418260

- ✓ For LEDs and other 1-10 V ballasts

Renovation motion sensor

MICROSAFE®

FEATURES

- ✓ Energy-saving product / category 1
- ✓ Prefabricated = Fast installation
- ✓ Installation time approx. 7 minutes.
- ✓ 360° detection.
- ✓ 100°x60° angle of coverage.
- ✓ Approx. 8-metre range.
- ✓ Easy to connect between existing light source.
- ✓ LED on front indicates movement.
- ✓ Construction and colour conform to RS-16 standard.
- ✓ Choice of cable lengths.
- ✓ No screws on front of detector.

Microsafe® MBD Prefabricated Motion Detector

The motion detector (MBD) is designed for automatic light control in rooms that are used sporadically, e.g. classrooms, smoking rooms, gyms, sports halls, stockrooms, laundry rooms, corridors, bathrooms, stores, etc., in order to save electricity.

The MBD has a built-in timer that can be adjusted from 2 seconds to 2 hours. The MBD can be used to advantage in combination with lights, extraction, heating, etc., and saves a lot of electricity in such contexts.

The desired turn-off time (delay) can be set on the back of the MBD by turning a rotary switch between 0 and F. The LED on the front indicates movement (activity).

The MDB Prefabricated comes with your choice of a 1.5- or 3-metre cable and 3 or 5 socket outlets.

TIPS MBD, energy-saving product no. 1 – offers up to 70% saving compared with a standard switch.

PART NO.	NAME	
1418269	MBD Prefab 16	16A/3600VA 1P
1418286	MBD Prefab 10	16A/2300VA 2P

TECHNICAL DATA			
Physical dimensions:	Conforms to RS16	Range:	Up to 12 metres
Voltage:	230 VAC +10/-20%	Angle of coverage:	360°
Max. load:	2,300/3,600 VA	Angle of coverage:	H100° x W90°
Fuse:	16 A	Det. zones:	92

NEW!

Available from
May 2017

Single-phase dimmer

MDimLed Micro

Trailing-/leading-edge dimming, universal,
4-250 W, pulse-controlled
Part No. 1403888

- ✓ Just 14 mm deep
- ✓ Preprogrammed for various LEDs and other lamps
- ✓ Screwless terminals
- ✓ No neutral (2-wire)

TIPS!

Load table for LED dimming

Get an overview of the lamps tested with our LED dimmers and how well they work, and get tips on recommended settings, etc.

Timer Set 16 A

MICROSAFE®

Microsafe® MTimer Timer Set Countdown Timer, prefabricated

The MTime countdown timer shows the remaining time counting down on the digital display. The time interval can be adjusted with the + and - buttons. MTime remembers the last time setting and has a setting for saving max. time.

MTime copes with a 16 A load and is suitable for safety sockets for coffee makers, etc. MTime also has a separate parameter menu for setting display dimming and max. time.

Can be used together with ELKO surface-mounting box.

Available with two or three sockets on request.

PART NO.	NAME	
1403879	Mtimer timer set	16A/3600VA 1P

TECHNICAL DATA			
Physical dimensions:	Conforms to RS16	Max. load:	3600 VA
Voltage:	230 VAC +10/-20%	Fuse:	16 A
Outputs:	Can be connected to pulse switch to start countdown (Fig. 1).		
Time setting:	0-59 min., 1.0-9.5 hours. Max. time can be saved (default 30 min.).		

FEATURES

- ✓ Digital timer.
- ✓ Comes ready mounted in double frame with socket.
- ✓ Can be used together with ELKO surface-mounting box.
- ✓ Simple saving of desired max. time.
- ✓ Display showing countdown of remaining time (TIMER).
- ✓ ON time set by button.
- ✓ Times over 59 min. are displayed in hours with a decimal point (90 min. = 1.5 hours).
- ✓ Hold button in for quick adjustment.
- ✓ Dim function for display light (P1).

PARAMETER MENU

Menu > Press - and ON/OFF simultaneously
 Scroll > Press ON/OFF button
 Select > Press +/-
 Reset > Press ON/OFF, + and - simultaneously

MENU	FUNCTION	VALUE
P0	Max. time setting	default 30 min.
P1	Display brightness	0-50

Other products

Wattmeter

RS16

Part No. 1418294

- ✓ Requires meter with s0 standard
- ✓ 2-module log unit for readings
- ✓ Conforms to RS 16 standard
- ✓ Displays actual usage
- ✓ History
- ✓ Can display outdoor temp.

Energy Savings Logger

Logs times and pulses

Item No. 800300

- ✓ Measures number of switch-ons and hours of operation
- ✓ Provides a great basis for calculating impact of installed measures
- ✓ Zero with the push of a button.
- ✓ Connect in parallel with load to be monitored

All lights on in event of alarm

Automatic lighting control in event of alarm

Part No. 6251651

- ✓ NO or NC switching from alarm
- ✓ Pulse input for external switch panel
- ✓ Button for testing function without activating alarm
- ✓ 6 channels for connection to contactors

Relays

1-pole

CENTROL®

FEATURES

- ✓ The Centrol® relays do not take up much space and replace contactors for 16 A.
- ✓ The relays do not give off much heat and have a self-extinguishing enclosure.
- ✓ The relays come with a snap mounting for rail installation and an off/off indicator LED.

Centrol® Relay 1-pole

CENTROL® relays are by far the best in the world. They are patented in most Western countries, and switch all loads up to rated current, sparklessly and with virtually no acoustic or mechanical noise.

The load is switched at zero crossing, giving the relays a superior life of 11 million switch operations.

Tips Globally patented relay technology that does not generate much heat or noise and switches most loads.

NB Take the starting current into account if the relay is to control iron-core transformers (max. 140 A/10 mS).

PART NO.	NAME	PROD. NO.
4150107	Centrol 1-pole 16 A relay	SSCR 024125016-5

TECHNICAL DATA			
Max. load/peak:	16 A/140 A	Current draw:	30 mA
Operating voltage:	24 V AC/DC	Contact voltage:	90-250 VAC
Life:	11m switch ops	Min. contact current:	100 mA
Switching frequency:	1 second	Overvoltage protection:	Yes
Thermal protection:	155°C	H/W/D:	90x18x58 mm
Max. residual voltage:	3 V

Pulse/Control Panel – General info

Universal control panel with pulse switches and feedback lights, for applications such as lighting and heating control.

Features:

- Simple to install (pluggable terminal strips).
- Text box for function description.
- Flexible panel ranges with lots of applications.
- Can be installed in surface-mounting wall frame or recessed box.

Suitable for, among other things:

- All Centrol dimmers/relays/thermostats (24 VAC).
- PLCs (24 VDC).
- Door locking systems (12 VDC).

Available in various designs and for various applications:

- **RS16:** Low-cost plastic panel that fits in standard installation box (Ø70 mm).
- **Celine:** Metal designer panel that fits in standard installation box (Ø70 mm). Perfect for modern homes!
- **Industry:** Metal panel for offices and industry.
- **IP66*:** Waterproof/dustproof panel.

Additional services:

- The panels can be supplied with labelling/text already applied.
- Can be supplied with stickers bearing standard texts, ready for affixing to the various switches.
- Custom colours for buttons (white/grey/black) and LEDs (blue, green, amber, etc.).
- We also fully customise panels to customer specifications. Just ask!

Centrol

Dimmers

CENTROL®

FEATURES

- ✓ 2-pole break and 'remembers' previously set level when switched on.
- ✓ Display shows brightness 1-99.
- ✓ Simple programming of max./min. level and lowest switch-on level.
- ✓ Electronic monitoring of operating temperature (safety).
- ✓ Pulse inputs (pulse dimming)
- ✓ 0-10 V input (0-10 V control)
- ✓ Buttons on front for adjusting brightness up/down and on/off.

CDimLed 400 400 VA Dimmer

The CDimLed can dim most dimmable light/lamp types, has a 2-pole break when switched off/on and remembers previously set level when switched on.

The dimmer can be operated in several ways: via the pulse inputs (pulse switch, Centrol panel, etc.), via the 0-10 V input (potentiometer, 0-10 V dimmer, PLC, etc.) and with the buttons on the front of the dimmer.

The dimmer also has override inputs for on and off, by signal from Centrol system, central control system, Astro timer, etc.

Light source	Power
Incandescent bulbs and 230 V halogen	5–400 W
12 V halogen with electronic transformer, trailing-edge dimming	20–400 W
12 V halogen with iron-core transformer, leading-edge dimming	20–400 VA
Dimmable Led light sources, trailing-edge dimming (Suitable for most LED drivers)	1–320 W
Dimmable LED light sources, leading-edge dimming	1–320 W
Dimmable energy-saving bulbs, trailing-edge dimming	5–320 W
Dimmable energy-saving bulbs, leading-edge dimming	5–320 W

PART NO.	NAME	MOUNTING
1418229	CDimLed 400	3-module for DIN35

TECHNICAL DATA

Physical dimensions:	53 x 90 x 58 mm (WxHxD)	Power:	400 VA (max. load 80% if reactive load)
Operating voltage:	230 VAC	Current draw:	50 mA
Protection:	Electronic	Material:	Self-extinguishing

WIRING EXAMPLE

CDIM700

700 VA, 3-module, leading-edge dimming
Inputs: pulse and 1-10 V
Part No. 1418232
